### Garment Care Guide

At Price & Buckland our garments are continually subjected to vigorous wash & wear tests in order to check their performance for shrink resistance, colour fastness and pill resistance. Care labels can be found in all of our garments and these instructions should be followed.

We recommend that garments are turned inside out for washing and that they are machine washed up to 40 degrees centigrade. Hand washing is not recommended. All our fabrics are dyed so that they are colour fast up to 40 degrees centigrade. Wash with similar weight garments. We do not recommend tumble drying.

You may wish to wash your sweatshirts before wearing them in order to prevent any surface fluff transferring from the inside of the garment. This fluff is the result of the process used to obtain the soft texture on the inside of the sweatshirts.
